

About Check-in desired file in SharePoint

Automatically performs a check-in operation for the designated file in Microsoft SharePoint.

Additional Files for Download

None

How to Configure

1. In studio, inside your process drag and drop microbot activity from the process components in flowchart, and then select the imported microbot.
2. Click Settings, and then click Input/Output Parameter Mapping for the respective microbot.
3. Configure the input/output parameters by creating the arguments in automation studio with respect to the parameters as mentioned below.

KEY	Direction	Description	Sample Value
CheckInComment	Input	Provide comments and the file will be checked in with an update	e.g. "Abc@ad.com"
PassWord	Input	Password of the user in unencrypted format	Password
SharePointSite	Input	SharePoint site address where user needs to be added to an existing group.	e.g. "https://infosystechnologies.sharepoint.com/sites/ESRVTRNG/" for SharePoint version Office365 e.g. "http://icp.ad.infosys.com/project/BIZPAMBS" for SharePoint version 2010
Server Relative path	Input	ServerRelativeUrl string in the following form, which excludes the name of the server or root folder - e.g. "/sites/ESRVTRNG/Shared%20Documents1/web_dummy.txt"	e.g. "/sites/ESRVTRNG/Shared%20Documents1/web_dummy.txt"

CheckInComment	Input	Provide the comments for file Checkin	
SharePoint Version	Input	Version of the SharePoint site.	e.g. "2010" or "Office365"
ErrCode	Output	Error code	Ex.-100
ErrDesc	Output	Error Description	Ex.- System Define Exception
IsSuccess	Output	Execution completed successfully or not	True\False

4. Use the output variable in your subsequent processing.
5. Click save option, then at the top-right, click Test run.
6. Upon successful test, the skill is ready to run application.
