

About Delete a task from Task Scheduler

Automated deletion of an existing task from the Windows Task Scheduler.

Additional Files for Download

None

How to Configure

1. In studio, inside your process drag and drop microbot activity from the process components in flowchart, and then select the imported microbot.
2. Click Settings, and then click Input/Output Parameter Mapping for the respective microbot.
3. Configure the input/output parameters by creating the arguments in automation studio with respect to the parameters as mentioned below.

KEY	Direction	Description	Sample Value
TaskName	Input	Name for the task which will be scheduled in the task scheduler	Ex.-"Notepad"
ErrCode	Output	Error code	
ErrDesc	Output	Error Description	
IsDeleted	Output	If at the end of execution, the microbot successfully delete a task from task scheduler then this parameter value will be true. If the task is not deleted from task scheduler or any exception occurs, it returns false.	(True\False)

4. Use the output variable in your subsequent processing.
5. Click save option, then at the top-right, click Test run.
6. Upon successful test, the skill is ready to run application.

Error Code

- 100 – System Define Exception.
- 101 – Taskname is empty.
- 102 - Task not found.
