

About Get radio button value from OracleEBS

Automated retrieval of port details from a process context in Oracle E-Business Suite.

Additional Files for Download

None

How to Configure

1. In studio, inside your process drag and drop microbot activity from the process components in flowchart, and then select the imported microbot.
2. Click Settings, and then click Input/Output Parameter Mapping for the respective microbot.
3. Configure the input/output parameters by creating the arguments in automation studio with respect to the parameters as mentioned below.

KEY	Direction	Description	Sample Value
WindowName	Input	Applet Window Name which has to be automated Oracle Applications - AUTOSC	
ApplicationPort	Input	Port on which java applet is running.	
RadioButtonId	Input	Search path of radio button/checkbox.	
RadioButtonLabel	Input	Label of the element	
RadioButtonStatus	Input	"TRUE" - Element is set. "FALSE" - Element is not set."	
StatusMessage	Output	Error message or success message of the running microbot	
Status	Output	Status of the microbot.	

4. Use the output variable in your subsequent processing.
5. Click save option, then at the top-right, click Test run.
6. Upon successful test, the skill is ready to run application.
