About Recognize text with Albie Vision OCR – GC

Identifies desired text from images using OCR technology - powered by Google Cloud Vision.

Additional Files for Download

Within 48 hours, you receive an email with an XML file - ReadKey.xml attached. The XML file consists of encrypted URL and a key to access the skill. Place the XML file in the folder as mentioned below.

How to Configure

1. In studio, inside your process drag and drop microbot activity from the process components in flowchart, and then select the imported microbot.

2. Click Settings, and then click Input/Output Parameter Mapping for the respective microbot.

3. Configure the input/output parameters by creating the arguments in automation studio with respect to the parameters as mentioned below.

KEY	Direction	Description	Sample Value
ImageFilePath	Input	Provide the path of the image to recognize text in it.	"D:\image.jpeg"
ReadKeyFilePath	Input	Provide the path of the ReadKey.xml file.	"D:\ReadKey.xml"
ImageReductionPercent	Input	This is used to reduce image size if needed.	"40"
Response	Output	Response of detected text stream.	
IsSuccess	Output	Return Value for Skill Execution in Boolean.	"true/false"
ErrDesc	Output	Description for error.	
ErrCode	Output	Error code in case of any error.	

4. Use the output variable in your subsequent processing.

5. Click save option, then at the top-right, click Test run.

6. Upon successful test, the skill is ready to run application.

Error Code

- 100 – System Define Exception.

- 101-Read key file path doesn't exist.

- 102-Invalid Image format. The image must be presented in JPEG, PNG, RAW, ICO, WEBP or BMP format.
