## Additional Files for Download

---

None

## How to Configure

---

1. In studio, inside your process drag and drop microbot activity from the process components in flowchart, and then select the imported microbot.
2. Click Settings, and then click Input/Output Parameter Mapping for the respective microbot.
3. Configure the input/output parameters by creating the arguments in automation studio with respect to the parameters as mentioned below.

KEY	Direction	Description	Sample Value
Url	Input	Dashboard Url that will come as output from Oracle EBS Launch and Login bot	
StatusMessage	Output	Message for final output.	
Status	Output	Execution Status Of the Skill	

4. Use the output variable in your subsequent processing.
5. Click save option, then at the top-right, click Test run.
6. Upon successful test, the skill is ready to run application.

## Error Code

---

- 100 – System Define Exception.
