

About Revert file check-out in SharePoint

Automatically cancels changes to the selected files by reverting check-out in Microsoft Sharepoint.

Additional Files for Download

None

How to Configure

1. In studio, inside your process drag and drop microbot activity from the process components in flowchart, and then select the imported microbot.
2. Click Settings, and then click Input/Output Parameter Mapping for the respective microbot.
3. Configure the input/output parameters by creating the arguments in automation studio with respect to the parameters as mentioned below.

KEY	Direction	Description	Sample Value
StrRelativepath	Input	The URL of the file. Start from the server name.	
UserName	Input	Provide the username for SharePoint site access, along with domain name.	"user@abc.com"
Password	Input	Provide the password for SharePoint site access.	"password"
SharePointsite	Input	SharePoint site path should be provided in URL form.	"https://sharepoint-site-url"
SharePointVersion	Input	Provide the SharePoint site version.	"Office365"
IsCheckedOut	Output	Return Value for Skill Execution in Boolean.	"true/false"
ErrDesc	Output	Description for error.	
ErrCode	Output	Error code.	

4. Use the output variable in your subsequent processing.

5. Click save option, then at the top-right, click Test run.
6. Upon successful test, the skill is ready to run application.

Error Code

- 100 – System Define Exception.
- 101 – SharePoint URL is empty.
- 102 – Username is empty.
- 103 – Password is empty.
- 104 – ServerRelativeUrl is empty.
- 105 – SharePoint Version is empty.
- 106 – Please check the SharePoint login Credential and Version.
- 107 – File is not checked out by the user.

Note:- When the SharePoint site does not support the authentication Enforcement, user will get an exception as, “Please check SharePoint login credentials and version”.
