## How to Configure

---

### User Configuration:

1. Edit/Map the below key value parameters according to your requirement.

| KEY           | Description  | Sample Value                                 |
|---------------|--|--|
| priceListName | Value of the Price list where Action to be performed   | "abc"  |
| Action        | Action needs to be performed   | "Update"                                     |
| LineType      | Value For Line Type  | "Abc"  |
| ItemList      | Item list is the string which contains the value of the items in specific format<br>“(itemName,itemPrice,StartDate,EndDate)” | “(abc,50,11/5/2018 0:00,<br>11/5/2018 0:00)” |
| priceAdminUrl | Navigation URL to pricing administration page  | “URL for Pricing Administration screen”      |

2. In the Home menu of the studio, double-click the process you have imported.
3. Click the Edit option at the top.
4. The current skill contains the signin application, you need to change your instance URL to signin application.
  - a. To change the signin application URL, click the Admin tab.
  - b. Navigate to the Application menu, and then select the required application from the Webapps list.
  - c. On the right side, in the Search Properties panel, change the URL to your instance value.
  - d. Save the application.
5. Make sure your signin application is in deployed state.
6. At the top-right, click Setup Environment, and then click Test Run.
7. Upon successful test, the skill is ready to run application.
